"To improve is to change; to be perfect is to change often." – Winston Churchill

## FONT INFORMATION

Casualistic was designed by Jeremy Gates as an open source typeface family, conceived primarily as a typeface for children's book writers and graphic novelists. Casualistic draws inspiration from the fun and loose distinctive feel of handwritten comics. Though relaxed in feel, the font has also been created with readability in mind. The typeface has been designed with extra letter spacing and a more generous width than other comparable Sans Serif fonts, in order to create a more pleasant reading experience in longer text passages.
